

Reducing carbon emissions: Creating a more sustainable way of living

Raven Renewables' Net Zero Carbon Vision

Mission – Raven Renewables' mission is to **reduce the amount of carbon emitted from buildings and to create a more sustainable way of living.**

We will support Britain move to a carbon neutral economy by 2050 and to make renewable energy technologies affordable and accessible to all.

Vision – Raven Renewables aim to be a **leading designer and installer of energy saving solutions** across South England. By 2025, we will be leaders in designing and installing renewable energy technologies. Leaders in terms of market share and leaders in terms of customer satisfaction. We will install tailored renewable energy systems in a further **350 homes**, helping over **1,000 customers saving 700 tonnes of carbon**. By doing that, we will be helping them **save up to £600,000/year in total on their energy bills.**

What is Raven Renewables?

Raven Renewables offer an **end-to-end service** and specialise in designing, installing and maintaining a range of cutting-edge renewable technologies such as:

- **air source heat pumps**
- **ground-source heat pumps**
- **solar PV**
- **electric vehicle charging points**
- **battery storage**

Founded by Raven Housing Trust, one of the most innovative and environmentally-conscious social housing organisations in the South East, Raven Renewables is perfectly placed to assist you on your net zero carbon journey.

Our planet is reaching breaking point and now is the time to act.

Raven Renewables, partner with local authorities and others, aims to improve the thermal efficiency of thousands of homes and support the UK's drive towards carbon neutrality.

Working with housing associations, local authorities, non-profit organisations, institutional investors, developers, contractors, private landlords and individual homeowners.

We are committed to helping you to:

- Reduce your carbon footprint
- Reduce fuel bills
- Improve the Energy Performance Certificate (EPC) rating of your home/ organisation
- Take advantage of financial incentives

As a designer and installer of renewable energy technology, we can create the **best and most complete solution for each home**, rather than only offering one renewable energy source.

Raven Renewables are on the same journey with retrofitting **6,000 of our own homes**. This will have a significant impact on carbon emissions, providing a more affordable and energy-efficient living environment for residents with the **advantage of government support and financial incentives**.

Backed by Raven Housing Group - our services are delivered by the **same qualified workers as our parent company, so customers can trust us**.

Raven Renewables:

- Operate under strict guidelines, regulations and governance
- Undertake full DPS checks to personnel
- Offer dependability with solid financial package
- Ensure high quality standards
- Understand working with vulnerable people
- Implement monitoring system for the provided services with minimum disruption

Why choose Raven Renewables?

Raven Renewables can:

- Provide smart technology and designing the system to maximise self-consumption, leading to **savings of up to £600 a year**
- Perform **heat loss calculations, maximising efficiency of heat pump** systems whilst making sure the tenant is comfortable at all times
- Specify appropriately sized renewable energy systems to **meet your needs and maximise return on investment**
- Provide a **dependable service**, through our secure and reliable supply chains
- Work alongside wider building programmes, **minimising disruption for customers**

Our business is built around the foundation of social good. So everything we do helps to improve homes and change lives **with all profits reinvested to grow our social housing offer**. Profits are not recycled to shareholders.

Get in touch with our experienced team to find out how we can help you develop and deliver your net zero strategy.
